EE 422C Project 7 Submission

Git URL: <https://github.com/Vadifire/Project-7>

Submitting:

- User.java
- Client.java
- MultiThreadServer.java
- ChatRoom.java

Testing

This code was tested on Windows machines. The testing consisted of running server code and multiple clients on the same machine, and inputting reasonable values. We also tested edge cases such as empty messages and backend commands. Because of the multithreading in our program, we could not properly determine the flow, so we debugged using console output.
